Objective

This challenge will help you to learn how to take a character, a string and a sentence as input in C.

To take a single character ch as input, you can use `scanf("%c", &ch );` and `printf("%c", ch)` writes a character specified by the argument char to stdout

```
char ch;
scanf("%c", &ch);
printf("%c", ch);
```

This piece of code prints the character ch.

You can take a string as input in C using `scanf("%s", s)`. But, it accepts string only until it finds the first space.

In order to take a line as input, you can use `scanf("%[^\n]%*c", s);` where s is defined as `char s[MAX_LEN]` where MAX_LEN is the maximum size of s. Here, `[]` is the scanset character. `^\n` stands for taking input until a newline isn't encountered. Then, with this `%*c`, it reads the newline character and here, the used `*` indicates that this newline character is discarded.

Change Theme Language: C

```c
#include <stdio.h>

int main()
{
    char ch;
    char s[100];
    char sen[100];

    // Read a single character
    scanf("%c", &ch);

    // Read a single word (string)
    scanf("%s", s);

    // To read a full sentence after a string, we must clear the
    // trailing newline left in the buffer by the previous scanf.
    scanf("\n");

    // Read the full line until a newline is encountered
    scanf("%[^\n]%*c", sen);
```

Line: 28 Col: 2

Upload Code as File Test against custom input Run Code Submit Code

```c
#include <stdio.h>

int main()
{
    char ch;
    char s[100];
    char sen[100];

    // Read a single character
    scanf("%c", &ch);

    // Read a single word (string)
    scanf("%s", s);

    // To read a full sentence after a string, we must clear the
    // trailing newline left in the buffer by the previous scanf.
    scanf("\n");

    // Read the full line until a newline is encountered
    scanf("%[^\n]%*c", sen);

    // Output the results
    printf("%c\n", ch);
    printf("%s\n", s);
    printf("%s\n", sen);

    return 0;
}
```

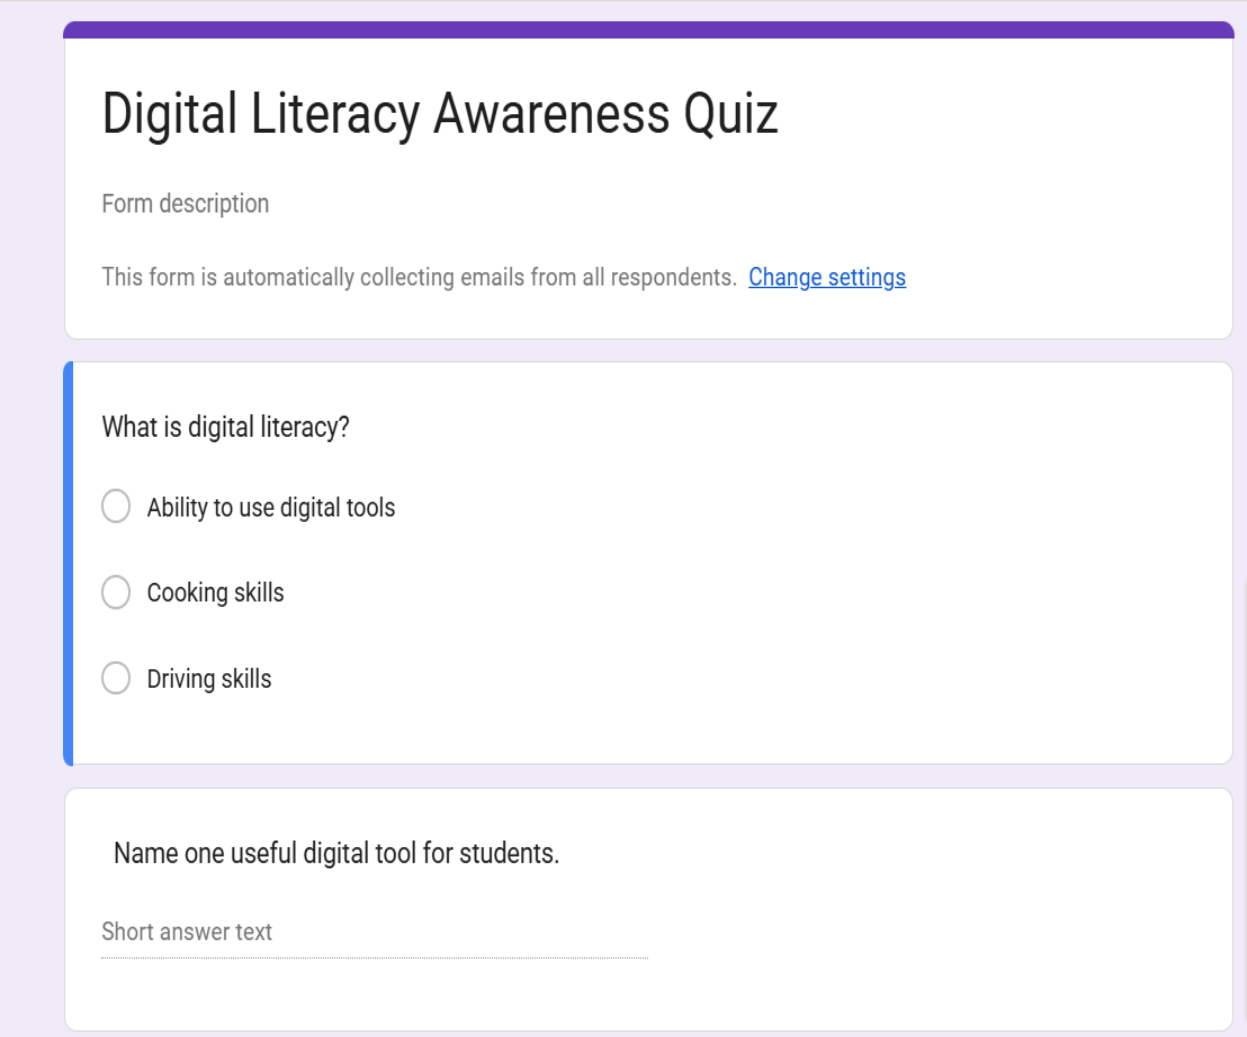
QUESTIONS:



Digital Literacy Awareness Quiz

Form description

This form is automatically collecting emails from all respondents. Change settings

What is digital literacy?

- Ability to use digital tools
- Cooking skills
- Driving skills

Name one useful digital tool for students.

Short answer text

Which is a safe internet practice?

- Sharing passwords with friends
- Clicking unknown links
- Using strong passwords
- Posting personal details online

Why is professional online presence important?

Short answer text

Which is proper email etiquette?

- Writing in all capital letters
- Using polite language and clear subject
- Sending empty emails
- Using slang language

RESPONSE:

5 of 5 points

Score not released
